Chef&Sommelier™
and Arcoroc™
are celebrating **Gin's** comeback!

As distilleries develop around the world, French Gin is showing its versatility with more than a hundred products now in existence. Thriving with variations aplenty (organic production, new fresh fruit infusion process, collaboration with top chefs), it's back at centre stage, making a major comeback in bars and cellars. But we can't discuss Gin or cocktails without mentioning glasses to complement their flavour.

To enhance the whole experience, Arcoroc™ and Chef&Sommelier™ bring you the ideal Gin pairing with collections featuring two serving options: stemmed glasses, adding a touch of glamour to premium cocktail creations, and tumblers, preserving Gin's authentic character.

Le Gin,

Dating back almost 300 years, this flavoured eau de vie is now a universal beverage, enjoyed as both an aperitif and a digestif. The key tonic note in a host of classic and modern cocktails, Gin now presents a sophisticated aromatic palette: Spicy, floral or herbaceous Gin; pink Gin flavoured with strawberries, red currants or raspberries; floral Gin on harmonies of angelica, gentian and iris; botanical Gin with hints of liquorice, thyme or rosemary; spicy on notes of coriander, pepper and cinnamon; and fruity with citrus flavours. Isn't it the aim of a cocktail to depict an imaginary journey in a glass?

Chef&Sommelier™ Macaron

A unique shape that truly stands out, perfect for signature gin cocktails!

Here, Gin rides the classic wave, twisted by the daring and original shape of the Macaron glass. Sismo Design for Chef&Sommelier™.
