Climate Roadmap & Circular Economy

Arc has initiated Arc Responsible, a program built around 7 topics whose implementation is planned until 2030.

The aim of this program is to reduce the environmental impact resulting from the design, manufacture, use and recycling of its products.

Simple, stylish and smart

Since its creation in the north of France in 1948, Luminarc has made beautiful tableware and cookware products while remaining functional, practical and affordable for everyone.

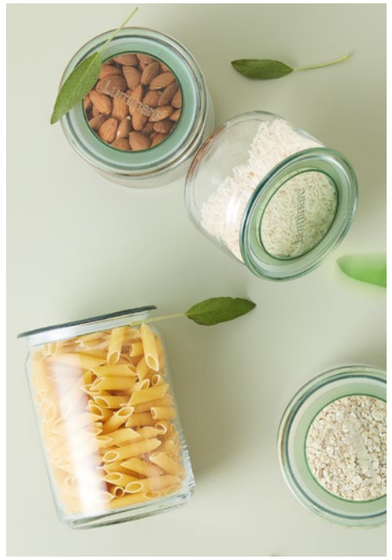

Our R&D center is equipped with a latest-generation laboratory. Chemists and researchers are pushing back the limits of technology to create the types of glass with great functionality, such as black glass, colored opal and culinary opal.

Luminarc adds style and joy of living by taking inspiration from current, seasonal and contemporary trends.

Today Luminarc is one of the world's leading tableware brands. It shares its French style beyond the borders of France in nearly 160 countries, with 400 million glass items sold each year.

The Luminarc team

Luminarc, the durable glass

QUIT DISPOSABLE CHOOSE DURABLE

Luminarc is committed to reducing its impact by producing as close as possible to our consumers around the world and by striving to control each state of the life cycle of its products. This includes choosing glass as our exclusive material and using materials that are sourced close to our production sites. We have the ambition to use more and more recycled glass. We limit packaging and use packaging cardboard. Our glass is a sustainable alternative to disposable plastic.
